Air handling unit Domekt R 200 V with integrated cooker hood

- Unit is specially designed to be integrated into the kitchen furniture over the cooker.
- Directly integrated cooker hood KOMFOVENT.

Cooker hood's and ventilation system's performances are compatible in Domekt R 200 V unit.

Unit Domekt R 200 V performs two functions:

- 1 Ventilates premise: ensures balanced ventilation with heat recovery supplying fresh air and extracting the used one.
- 2 Extracts the used air through kitchen hood: during cooking a user switches on the hood and the air is extracted through the hood by the unit. Kitchen hood has a specially designed damper inside. The air flow through the hood is adjusted with it.

NEW – KOMFOVENT cooker hood

White and modern cooker hood will decently fit in all kitchens.

- Extremely slim – the height is only 2,6 cm.
- Effective grease filters are dishwasher safe.
- Energy saving LED (2×2 W) illumination lights provide clear visibility during cooking.
- Integrated softly closing damper.
